

BREEZI

High Chair

The Breezi range is one of the most popular paediatric seating systems in Ireland.

The Breezi High Chair is an easily adjustable high chair that encourages good posture and independence.

The height adjustment is achieved by means of simple retaining screws for the seat and the foot rest and, as a result, the chair is suitable for use by children of varying ages. Suitable for use within home and school environments this product is supplied as a flat pack and is easily self-assembled.

It is available with a range of useful Breezi Chair accessories.
