

# The Easyrider

Semi recumbent Tricycle

**The Easyrider** is a semi recumbent tricycle designed for people with low tone in the lower limbs. The lower centre of gravity and slanted wheels improve the riding safety and stability, thus avoiding toppling over as is common in other tricycles.

The Easyrider is hoist accessible allowing for an easy transfer, The riding comfort and stabilization in the seating position is provided by the structure of the seat with backrest.

Options include a 4 point harness, lateral supports, AFO footplates, parental rear steering control

Colours available
