

The Movita Walker

Anterior Support Walker

The Movita is a versatile four wheeled walking frame which helps children and adults to gain greater independence and personal mobility. The Movita is easy to access for transfer and it's unique lifting system enables carers to raise the user from sitting to standing with very little effort.

The Movita is suitable for indoor and outdoor use and differs from similar walkers on the market, because of it's slightly inclined frame which creates greater user stability. The Movita trunk units can also be interchanged quickly and easily

Accessories Include: Foot separator, knee separator, footrest, anti-tipping System, directional Locking swivel wheels, anti return wheels, variable damping springs.
