

# Svan Balance

WC frame

Svan Balance WC frame is designed to facilitate transfer and toileting for children, people of short stature or other adults.

The product consists basically of a toilet surround with foot rest that can be combined with optional arm rests and support handles according to the requirements of the user. No matter how you combine the various parts, Svan Balance works very well for the whole family because of the quick and easy shift from safe support for the user to a normal toilet seat for all.

**Svan Toilet Frame** The footrest is providing stability for the whole body. It is adjustable in four different heights.

The armrests provide support and comfort and allow the user to toilet safely. They are easily adjustable in three heights. The support handles provide a stable support by transfer and functions as fall prevention as well.

Additionally you can use a toilet seat reducer, which is available in four different sizes.

**Svan Toilet Frame Svan Balance** is manufactured from coated stainless steel to meet the high demands on quality in wet bathroom environments.

Support handles, armrests and footrest are all made of materials that provide excellent comfort. All parts are easy to keep clean.
